After checking with Contractor of HY/2009/19, breaking works were conducted on 27 and 28 March 2018 during the monitoring period and environmental deficiencies including i) inadequate extend of temporary noise barrier for shielding the line of sight to nearby sensitive receiver and ii) insufficient noise screening for breaking and iii) continuous breaking works without intermittence were found to be the major contribution to the measured noise level and hence the exceedances were considered as Project related. Based on the review of the site arrangement, extent of construction operation and the associated PME required for the works, overall enhancement and remedial actions including i) provision of additional temporary noise barrier, ii) repairing of damaged or incomplete temporary noise barrier installed for the breaking works, iii) provision of additional acoustics screen to the breaking tip in addition to temporary noise barrier installed, iv) covering of breaker tip with acoustic material for noise reduction and conduct breaking works intermittently were advised for Contractors implementation to mitigate the noise impact recorded at the concerned monitoring station upon identification of exceedance and the Contractor was advised to refrain from the impact associated construction works prior to the implementation of the remedial / enhancement and confirmation of the implementation of the mitigation measure. As confirmed with the Contractor, the concerned construction works was completed as of 28 March 2018 and no further exceedance was recorded.

After checking with Contractor of HY/2009/19, no construction works was conducted on 26 April 2018 during the monitoring period. In view of the above, the exceedance was considered as non-Project related and potentially contributed by nearby traffic
